SANTANDER

Playa del Sardinero

La costa cantábrica, inquieta y brava durante los meses invernales, se torna al mediar el año en tranquila y apacible, y la Naturaleza derrocha en ella sus galas y sus dones. Vida alegre y brillante se despierta allí tan pronto como el verano se acerca. Santander, joya del Cantábrico, luce entonces sus mejores gracias y brinda franca acogida a cuantos a ella llegan en busca de alegría y de salud. Temporada de halagos y atractivos en que se suceden durante tres meses fiestas de arte y deportes.

El panorama de Santander es de una belleza incomparable. Sus paseos y sus bosques que tienen siempre como fondo el mar, ofrecen vistas deliciosas. Situada sobre una hermosa y anchurosa bahía rodeada de pueblecillos pintorescos y al pie de una colina en cuya altura se con-

Fachada principal de la Colegiata Foto Mas

A unos 15 km. del Océano, en lo alto de una meseta emplazada al N. E. de Cádiz y al N. del río Guadalete, de cuya margen occidental dista solo unos kilómetros, está situada la hermosa ciudad de Jerez de la Frontera, una de las más bellas poblaciones andaluzas con cerca de 50.000 habitantes y unos 4.000 edificios alineados en anchas calles sombreadas por naranjos y palmeras que producen una impresión en extremo agradable a la que contribuye la nota típica de las bajas ventanas adornadas con floridos macetones de rosales, claveles y geranios: el blasón de Andalucía.

Son fabulosas o inseguras las noticias que se tienen de los tiempos anteriores a la dominacion agarena. Después de la batalla del Barbate la tomó Tarik sin resistencia. Durante el Emirato empieza a adquirir importancia y su situación fronteriza la hace crecer en los días del

Cette belle capitale andalouse située dans une riche campagne au bord de la Méditerranée, eut une origine illustre dont il ne reste aujourd'hui que quelques traces. Elle fut successivement une ville phénicienne, grecque et romaine (on retrouve, dans certains monuments des vestiges de cette dernière domination) mais elle n'atteignit sa véritable importance historique qu'au Moyen-Age, quand, à la chute du Califat d'Occident, fut créé le royaume de Malaga, dépendant de celui de Grenade. Après plusieurs tentatives de la part des chrétiens, Malaga tomba au pouvoir des Monarques Catholiques, Ferdinand et Isabelle en 1487. Au XIX^{e} siècle, elle se fit remarquer par son attitude favorable à la cause libérale.

TENERIFE

Santa Cruz de Tenerife

TENERIFE, la mayor de las islas que forman el Archipiélago Canario, está situada entre los 28° y 28° 36' de latitud Norte y 15' longitud Oeste del meridiano de Greenwich, a 704 millas de Cádiz, posición geográfica que le garantiza el delicioso privilegio de un clima incomparable.

Su suelo, cortado y desigual, de origen volcánico, rico en formaciones geológicas interesantísimas, sube escalonándose desde el mar hasta *Las Cañadas*, inmenso cráter por hundimiento que forma hoy un planicie circular de 12 kilómetros de diámetro a 2.000 metros de altura, en cuyo centro se levanta el cono gigantesco del Teide que alcanza los 3.700 metros en su vértice coronado de nieve casi todo el año.

La naturaleza y especial configuración del terreno, no sólo ofrecen las más varias e insospechadas perspectivas con una riqueza panorámica sin rival, sino que, por caso único en el mundo, en la reducida extensión superficial de 2.300 Kms. cuadrados, se aclimata fácilmente la flora de
